

## Assignment Tracker - Project Plan

### Objective

The **Assignment Tracker** is a web-based application designed to help students keep track of their assignments. The application will allow users to add, view, edit, and delete assignments easily.

### Features

1. **Add Assignments:**  
Users can create new assignments with a title, description, and due date. Validation ensures required fields are filled.
2. **View Assignments:**  
A list of all assignments will be displayed, with options to edit or delete each one.
3. **Edit Assignments:**  
Users can update assignment details, such as the title, description, or due date.
4. **Delete Assignments:**  
Assignments can be deleted with a confirmation prompt.
5. **Search and Sort:**  
Users can search for assignments by title and sort them by title or due date.
6. **Responsive Design:**  
The application will work well on both desktop and mobile devices.

### Technologies

- **Backend:** Node.js and Express.js
- **Frontend:** EJS templating
- **Database:** MongoDB with Mongoose
- **Styling:** Bootstrap
